

ABOUT ME

Motivated and detail-oriented MCA postgraduate at KL University with strong foundations in Python, Machine Learning, and Web Development, seeking an entry level role to apply technical expertise in real world projects, contribute to organizational success, and continuously upskill in a dynamic professional environment.

INTERNSHIP

AI & ML INTERN
INNOVATE

JUN 2025 - JUL 2025

- Successfully completed a 4-week AI & Machine Learning internship with Innovate Intern, focusing on the end-to-end development of a Face Recognition-Based Attendance System using Flask, OpenCV, and Machine Learning with an interactive GUI.
- Project Execution: Successfully delivered a high-quality end-to-end project that met industry standards, effectively applying AI, machine learning, and computer vision concepts to real-world scenarios.
- Professional Growth: Gained strong professional exposure under industry mentorship, enhancing my problem-solving, analytical thinking, and project development skills.

WORK EXPERIENCE

BUSINESS
DEVELOPMENT

Bangalore
Jan 2026 - Mar 2026

Edtech

- Managed business development activities for Learnflu, focusing on identifying and engaging prospective clients and institutional partners in the education sector
- Conducted market research to map potential customer segments and inform outreach strategies aligned with EdTech product offerings
- Performed targeted outreach through calls and emails to initiate conversations, qualify leads, and schedule follow-up discussions or product demonstrations
- Collaborated with internal teams (sales, marketing, and product) to tailor proposals, refine value propositions, and ensure alignment between customer needs and Learnflu solutions
- Supported onboarding of new clients by coordinating logistics, sharing product information, and facilitating initial training or demo sessions
- Maintained and updated CRM records to track lead status, communications, and next steps, ensuring continuity across the sales cycle
- Collected and relayed customer feedback to the product and marketing teams to help prioritize feature improvements and messaging adjustments

APPRENTICESHIP

Guntur
Mar 2026 - Present

Data ENTRY OPERATOR

- Performed data entry tasks as a Data Entry Operator at Write Information Technology in Guntur, ensuring accurate transcription of information into company systems
- Maintained and updated electronic records and databases to keep information current and organized
- Verified data for completeness and consistency, correcting errors and resolving discrepancies when identified
- Used data entry software and spreadsheets to input, sort, and retrieve information efficiently
- Followed company procedures and quality standards to preserve data integrity and confidentiality
- Collaborated with colleagues to support team workflow and meet daily processing requirements
